

Curious about what GENEROSITY  
could do next?

**DREAM WITH US.**

Foundation name/web address

You may never meet many of those who make your care better, but they are part of our team. They are young and old, wealthy and poor, entrepreneurs and neighbors—people who know what it is like to be here. They give in different ways to help us do remarkable things for you.

In the area of the hospital where you are today, generosity is helping create rooms that can instantly be converted to intensive care rooms, innovations to detect and eliminate infections, spaces for family to more comfortably sleep near patients day or night, and a mobile health platform so patients and physicians can interact from anywhere. And that's just the beginning.

We hope each time you see something special you wonder about the people you will never meet who are making a difference for you today.
